FNP — Ferns N Petals

Sales Analysis — Executive Summary

Period: FY 2023
Prepared by: Utsav Gyawali

Key Performance Indicators

126	₹35,20,984	5.53	₹4,652
Total Orders	Total Revenue	Avg Order & Delivery Time (days)	Avg Revenue per Customer

Business Overview

FNP (Ferns N Petals) recorded 126 total orders during FY 2023, generating total revenue of ₹35,20,984 with an average revenue per customer of ₹4,652. The average combined order and delivery time stood at 5.53 days, reflecting the company's gifting and floral logistics model across multiple cities in India.

Revenue Trends by Month

Monthly revenue analysis reveals a strong seasonal pattern. February recorded the highest revenue peak, driven primarily by Valentine's Day demand. A secondary peak was observed in August–September coinciding with Raksha Bandhan. Revenue dipped in the mid-year months of March through June before recovering in Q3 and Q4, suggesting a concentration of demand around festive and gifting occasions.

Revenue by Occasion

The following occasions drove the highest sales volumes across the year:

Occasion	Revenue Range	Insight
Anniversary	₹7,000,000+	Highest-grossing occasion
Raksha Bandhan	₹6,500,000+	Strong seasonal spike in August
All Occasions	₹6,000,000+	Year-round evergreen demand
Holi	₹5,000,000+	Spring festival driver
Birthday	₹5,000,000+	Consistent recurring demand
Valentine's Day	₹3,500,000+	February peak event
Diwali	₹3,000,000+	Q4 festive boost

Top 5 Products by Revenue

The top revenue-generating products highlight customer preferences in gift selection:

Product	Revenue (approx.)	Notes
Magnam Set	₹1,20,000+	Top-selling product overall

Exercitationem Pack	₹1,00,000+	Strong gifting bundle performance
Expedita Gift	₹90,000+	Premium gift category
Fugit Set	₹70,000+	Mid-range popular choice
Nihil Box	₹75,000+	Consistent seller

Revenue by Product Category

Soft Toys emerged as the highest-revenue product category, followed by Colors and Sweets. Mugs represented the lowest revenue contributor among tracked categories. This distribution suggests that experiential and tangible gifting items (plush toys, festive colors) outperform utility-based gifts in the FNP catalog.

Geographic Performance — Top Cities

Kavali led all cities in total order volume, followed by Medinipur and Thirubarjupalli. The top 10 cities span across India, with Tier 2 and Tier 3 cities featuring prominently, indicating significant penetration beyond metro markets. Cities such as Bhimavaram, Belgaum, and Bethampur also showed strong ordering activity.

Order Timing Insights

Revenue by order hour shows a pronounced spike around midday (11:00 AM – 1:00 PM) with a secondary peak in the late evening (8:00 PM – 10:00 PM). Early morning hours (1:00 AM – 6:00 AM) recorded near-zero activity. This pattern suggests that targeted promotions or flash sales scheduled around peak ordering hours could maximize conversion rates.

Strategic Recommendations

- **Double down on Anniversary & Raksha Bandhan:** These two occasions account for the largest revenue share. Dedicated campaign budgets and early logistics preparation are advised.
- **Expand Soft Toys & Colors product lines:** These categories lead revenue; broadening SKU range and bundling with occasion-specific offers can increase basket size.
- **Leverage Tier 2/3 city demand:** Cities like Kavali, Medinipur, and Bethampur show strong organic demand. Targeted local campaigns and express delivery options can unlock further growth.
- **Optimize for peak order hours:** Launch time-sensitive offers between 11 AM–1 PM and 8–10 PM to capitalize on highest order intent windows.
- **Reduce mid-year revenue dip:** Introduce non-seasonal gifting campaigns (e.g., corporate gifting, thank-you gifts) for March–June to smooth the revenue curve.
